## DETAILED ACTION

### **ART REJECTION:**

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 16-19 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson et al(5,400,246).

-- In considering claim 16-19, the claimed subject matter that is met by Wilson et al(Wilson) includes:

1) the automatic selection and grouping of alarm sequences in the alarm log and as well the automatic generation of a partial alarm log is met by the summary of I/O Channels display screen(210) which includes selection and grouping of alarm sequences in an alarm log based on the particular summary list(analog(212)/digital(214)) selected, thereby displaying a partial alarm log for each group of similar alarm sequences(see: figure 3J, column 12, lines 26-43; column 18, lines 7-25);

2) the automatic learning of frequent chronicles in each partial alarm log so as to generate a partial set of frequent chronicles and production of a set of frequent chronicles in the alarm log is met by the Overall Summary which is useful for

troubleshooting based on frequent chronicles of each partial alarm log(see: column 18, lines 26-49).

***Allowable Subject Matter***

3. Claims 20-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
